

ELYATIME ILYASS

Software Developer

+212677728707 @ ilyasselyatime0@gmail.com

SUMMARY

Highly motivated aspiring **software developer** with a passion for crafting user-friendly and functional **apps**. Eager to **learn** from experienced professionals and contribute to **innovative projects**.

EDUCATION

10/2024 - Present

Ben Guerir, Morocco

Software Engineering

1337 Coding School

- Developing proficiency in **C**, through **hands-on projects** like creating personal **libraries**.
- Built a 2D game, gaining hands-on experience in graphics **rendering** and game **logic** development to create an **engaging** user experience.
- Learned **algorithm** design, covering **sorting** and **searching** techniques to optimize software and **problem-solving** skills.

LEET

10/2023 - 04/2024

Casablanca, Morocco

Web Development

LionsGeek

- Built a strong foundation in **HTML**, **CSS**, and **JavaScript**, with potential exposure to **frontend** frameworks like **React** for complex user interfaces.
- Experienced in building web applications using **backend** frameworks like **Laravel** (PHP).
- Equipped with **Git** for collaboration and building **user-friendly**, **responsive** websites.

10/2022 - 02/2023

Casablanca, Morocco

Coding with python

GOMYCODE

- Understanding **data structures** and **object-oriented** programming concepts.
- Hands-on experience with essential Python libraries like **NumPy**, **Pandas**, and **Matplotlib** for data analysis.
- Equipped with **scripting** and **automation** skills.

GOMYCODE

PROJECTS

YES Africa

JADARA

<https://youthempowermentsummit.africa/>

- Assisted in developing the **Youth Empowerment Summit** (Y.E.S Africa) website, including its **management backoffice**, to enhance user engagement and streamline **administrative** processes.

DotBot

.Learning

<https://github.com/ie-orphane/.learning.bot>

- Developed a learning bot (.learning.bot) as a **personal** project, implementing automation and interactive functionality to support **self-learning** and **coding practice**.

Casatourat

Casamémoire

<https://casatourat.ma/>

- Building the **front-end** for both the **website** and the **mobile app**.
- Developing an **API interface** to connect the **back-office** system with the **mobile** application.
- Implementing **the back-end architecture** to support seamless data flow and functionality across both **platforms**.

LionBot

LionsGeek

<https://github.com/ie-orphane/lionbot>

- Community management and automation bot written in **Python**, to support the coding community at LionsGeek
- Implemented **leaderboards**, challenge/review **workflows**, and **gamified** reward features (coins, challenges), boosting member **engagement** and reducing manual overhead for coaches.

LionsGeek.ma

LionsGeek

<https://lionsgeek.ma/>

- Designing and developing a **landing page**, enhancing user engagement to showcase the expertise in **digital marketing** and **coding**.

[Nextjs](#)

[Bash/Git](#)

[C/C++](#)

[Scripting](#)

[Web Scraping](#)

VOLUNTEERING

Manager

Siraj

📍 1337 ben guerir

A club support student growth through sessions, workshops, and events

Organizer

HackAi

📍 1337 ben guerir

An AI-focused hackathon event bringing together developers, innovators, and students to build AI-driven solutions
